Associazione Munsel Society via ai Ronchi 12a - 6500 Bellinzona

Newsletter summer 2026

This summer's program, already underway in Ladakh and nearing its conclusion, was also very enriching and rewarding for Munsel School, which continues to **build** and **consolidate** its projects!

In June, thanks to the invaluable collaboration of Guillaume's family, who recently concluded their volunteer work with great mutual satisfaction, our students participated, along with two other non-governmental organizations, in a **sports day** organized in Leh.

In mid-August, for the second time, **Indian specialists** at **Olly Hospital** in **Delhi** held another four-day course. They offered hands-on activities involving the students, alternating with moments of observation and evaluation.

Regarding staff **development** and **training**, Munsel School holds meetings with a specialist in rehabilitation psychology every Wednesday.

This supervision focuses specifically on the **nursery**, the project designed to care for the children, established two years ago with government support.

Padma Youron, the new **physiotherapist**, has also been hired full-time.

The **integration** of students into **public schools** continues successfully.

Manish and Tsewang have been admitted to Shushot Secondary School, where they will continue their studies.

Gyachok and Dasal will be able to attend elementary school in Leh.

All of this has been possible thanks above all to the enormous trust and support of our backers and friends who have shared our challenges and successes from the very beginning!

We sincerely thank you for your indispensable support, which we hope to continue to count on. You can find more information and images about our activities on our website:
